

REPORT

COMPLETION OF P3D FOR EAST NUSA TENGGERA MARINE AFFAIRS & FISHERIES AGENCY AND DUGONG REGULATION

Alexandra Maheswari Waskita
WWF-INDONESIA

This Project is executed by the Mohamed bin Zayed Species Conservation Fund, with financing from the GEF, implementation support by UNEP and technical support from the CMS Dugong MoU Secretariat.

PRELIMINARY

Background

Indonesian government committed to international world to build 20 millions hectar area of Water Conservation Area in 2020 and manage it effectively. To calculate the effectiveness of the management of this conservation area, Indonesia has national standart, that is a Technical Evalution Guidelines of Effectivity in Water Conservation Area, Shore, and Small Islands Management. Provincial government has an authority in planning and management of the conservation area, as a mandate to execute the primary management function.

Nusa Tenggara Timur (NTT) province has four water conservation area that was suggested by Regency government: Marine Protected Area of Pantar Strait (MPA of Pantar Strait) in Alor Regency, SAP of East Flores, Conservation Area in Lembata Regency, and Conservation Area in Sikka Regency. MPA of Pantar Strait is the first set by Injucntion of Marine and Fisheries Minister number 35/KEPMEN-KP/2015 (Keputusan Menteri Kelautan dan Perikanan No.35/KEPMEN-KP/2015).

After the issuance of Law no. 23 of 2014, the Regency government have to submit the Personnel, Funding, Facilities and Infrastructure (P3D) Document of Conservation Area Management to the provincial government. But until now there are still some Regencies that have not completed the stewardship of P3D. As a commitment and support to the acceleration of effectiveness of conservation area management which will be done in SAP Pantar Strait and the surrounding Sea, WWF-Indonesia helps the smoothness of this effort by facilitating meetings to complete P3D and establishment of KKPD in East Flores, Sikka and Lembata.

Acceleration towards the completion of the NTT P3D is also a starting point in the implementation of the Dugong and Seagrass Conservastion Project that located in Alor Regency, NTT. Dugong has been threatened with extinction and protected by the government (PP No. 7 of 1999), its instability is triggered by the high hunting of dugong for meat, bones and fangs, and the incident when it was caught unintentionally (bycatch). Another threat that occurs today is the uncontrolled and irresponsible tourism conducted in the waters of Mali, Kabola Regency. This threat is reinforced by the high exposure of media that has provided information to the public to see dugong in Pantar Strait MPA. If the government as the conservation area manager of Pantar Strait MPA does not immediately issue a regulatory policy on the utilization of dugongs, it can potentially trigger an irregularity record that threatens the existence of dugong.

As an initial step to solve the existing problems, WWF-Indonesia and Fisheries Department of Marine Affairs (Dinas Kelautan dan Perikanan/DKP) of Alor Regency facilitate DKP of NTT Province and Tourism Office of Alor Regency to initiate the formation of policy in province level related to dugong management which is under the management of conservation area of Pantar Strait MPA. This effort is being made, alongside the efforts to improve the assistance to local communities (village/ kelurahan and local communities) that already exist. Several identified community groups, environmental groups OI Oho, the Mail Maha fishery group, the mangrove conservation group – Kelompok Cinta Persahabatan, Coastal Monitoring Community (kelompok masyarakat pengawas pesisir/Pokmaswas) are involved in supporting the continuous conservation efforts undertaken by the government. The support is encouraged in the

form of best practices undertaken in the daily life of coastal communities, and by encouraging the formation of regulating and binding village/kelurahan regulations.

Purposes

The completion of the P3D aims to come up with a collective agreement to accelerate the settlement of P3D KKPD in NTT. The dugong management policy initiation meeting aims to have an understanding of all stakeholders regarding the program through the socialization of dugong management activities and the presence of road map of dugong management policy in NTT Province.

RESULT

The meeting was held for 2 days, 26 September 2017 for the acceleration of P3D and 27 September 2017 for initiation of dugong management policy.

THE RESULT OF THE ACCELERATION MEETING SUBMISSION OF REGIONAL WATER CONSERVATION AREAS OF NTT PROVINCE

MPA IN KALABAHI , 26 SEPTEMBER 2017

In order to follow up the process of handing over the affairs of the Regency/City to the Province related to the management of the water conservation area, an acceleration meeting of personnel handover, funding, facilities and infrastructures and documents (P3D) of the Regional Water Conservation Area (KKPD) of East Nusa Tenggara (NTT) Province covers Alor Regency, East Flores, Lembata and Sikka on September 26, 2017 located at Kalabahi, Alor Regency.

The meeting was opened by the Regional Secretary of Alor Regency and was attended by The Directorate of Conservation and Marine Biodiversity of Ministry of Marine and Fisheries, The NTT Provincial Regency Government Bureau, The NTT Provincial Regulatory Organization Bureau, The Marine and Fishery Service of The NTT Province, The Maritime and Fishery Service of NTB Province, Regional Secretary of East Flores, Lembata and Sikka Regencys, Financial Management and The Assets Office of the Area of The Sikka Regency, Marine and Fisheries of Alor Regency, Fisheries Departments Of East Flores Regency, Fishery Offices of Sikka and Lembata Regency, WWF-Indonesia, Lintas Khatulistiwa foundation, and Misool Baseftin.

Pay attention:

1. Greetings and directions from the Regional Secretary of Alor Regency
2. Lectures by The Directorate of Conservation and Marine Biodiversity of the Marine and Fisheries Ministry
3. Lectures by Bureau of Regional Secretary Government of Nusa Tenggara Timur Province
4. Lectures by Organization Bureau Secretariat East Nusa Tenggara Province
5. Presentation from The Office of Marine and Fisheries of Nusa Tenggara Timur Province
6. Presentation from The Office of Marine and Fisheries of Nusa Tenggara Barat Province.

As well as considering the suggestions, inputs and questions, the participants agreed to formulate strategies and programs for the management of Water Conservation Areas of Sea, Coastal and Small Islands of Nusa Tenggara Timur Province as follows:

1. Delivering P3D KKPD NTT at the level of East Flores regency, Lembata and Sikka in NTT Province Level at the end of October 2017.
 2. Encourage NTT Provincial Government to design a watershed conservation management institution based on prevailing laws and regulations.
-

3. Encourage NTT provincial government to place a regional coordinator in waters conservation area of Alor, East Flores, Lembata and Sikka Regencies, until the establishment of regional watershed conservation institution has done.
4. Accelerate the process of determining the area of water conservation area of East Flores, Lembata and Sikka Regencies no later than October 2018.
5. The expected form of the management institution is an institution that not only takes care of conservation but also has supervision, monitoring, community empowerment and permitting authority.
6. Establish co-management mechanism through management assistance task from Provincial KKPD Management Board to Regency/City.
7. Improving the management of coastal and marine resources within the watershed conservation area of Nusa Tenggara Timur Province:
 - a. Conducting control and supervision of regional water conservation area.
 - b. Streamlining the NTT's KKP3K network to address cross-border issues of Aquatic Conservation Areas.

Thus the formulation of the outcome of this meeting is prepared, to be followed up together in accordance with the provisions of legislation

THE RESULT OF WORKSHOP MEETING INITIATION POLICY MANAGEMENT DUGONG PANTAR STRAIT MPA ALOR REGENCY NTT PROVINCE IN KALABAHI, 27 SEPTEMBER 2017

In order to follow up the Dugong protection management process in Pantar Strait MPA Alor Regency, a Workshop on Initiation of Dugong Management Policy KKPD Pantar Strait MPA Alor Regency on September 27, 2017 located in Kalabahi, Alor Regency.

The meeting was opened by the Head of Marine and Fisheries Office of Alor Regency and was attended by Directorate of Marine Conservation and Marine Affairs of the Ministry of Marine Affairs and Fisheries, Legal Bureau of NTT Provincial Secretariat, Department of Marine Affairs and Fisheries NTT Province, NTT Tourism Office, BBKSDA NTT Province, Fishery of Alor Regency, Legal Department of Regional Secretary of Alor Regency, Tourism Office of Alor Regency, Himpunan Peramu Wisata (HPI) of Alor Regency, Community Empowerment and Alor Regency Office, Kabola Village Head, Deere Beach Village Head, Ol Oho Environmentalist Group, Mail Maha Group, Pokmaswas Sinar Kabola, Pokmaswas Tanjung Muna, WWF-Indonesia, Lintas Khatulistiwa Community Institution, Air Dive Manager, La Petite Kepa Manager, Mala Tour Manager.

Pay attention:

1. Greetings and directions from the Head of the Department of Marine and Fisheries of Alor Regency
2. Presentation of the Directorate of Conservation and Marine Biodiversity of the Ministry of Marine Affairs and Fisheries of the Republic of Indonesia
3. Lectures by WWF-Indonesia Lesser Sunda Program

As well as considering suggestions, inputs and questions, the participants agreed to formulate strategies and programs for the management of Dugong and Its Habitat in KKPD Pantar Strait MPA and the Surrounding Sea is as follows:

1. Agree to carry out the management of the limited use of dugong tourism and its habitat in Pantar Strait MPA and the Surrounding Sea as set forth in provincial governor regulation, village regulation and standard operational ethics/operational of limited tourism dugong.
 2. Standard operational procedures for the use of limited tourism dugongs are authorized by the Provincial Marine and Fishery Service and adopted by the village.
 3. There should be additional survey and related studies of dugong populations, study the carrying capacity of dugong tourism and other studies.
 4. Institutions that have authority and dugong in the management of dugong and its habitat is the manager of Pantar Strait MPA and the Surrounding Sea, as well as in dugong monitoring activities in coordination with BBKSDA NTT Province.
-

5. The institutional aspect that is needed in the implementation of dugong management and its habitat is the manager unit of Pantar Strait MPA.
6. In the future, the management of Dugong and its Habitat by the village in each region will be partnered with the management unit of Pantar Strait MPA.
7. Encourage legal oversight and law enforcement mechanisms by the government involving community groups and tourism businessman.
8. The mechanism utilization of dugong tourism should involve the local community of registered tourism businessman and have the knowledge and ability to apply the agreed POS.
9. Encourage sustainable funding mechanism (Conservation Participatory Funds) in the Dugong tourism utilization process whereby they are reused for dugong protection management activities (Pokmaswas Patrols, habitat rehabilitation, etc).
10. Standard Operational Procedures will be formulated by WWF-Indonesia and will be consulted at a follow-up meeting.

Thus the formulation of the results of this meeting is prepared, to be followed up together in accordance
